

`/*copy the same by string with pointer*/`

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    char x[]="aliah";
```

```
    char t[50];
```

```
    char *p=x;
```

```
    char *q=t;
```

```
    while(*p!='\0')
```

```
    {
```

```
        *q=*p;
```

```
        p++;
```

```
        q++;
```

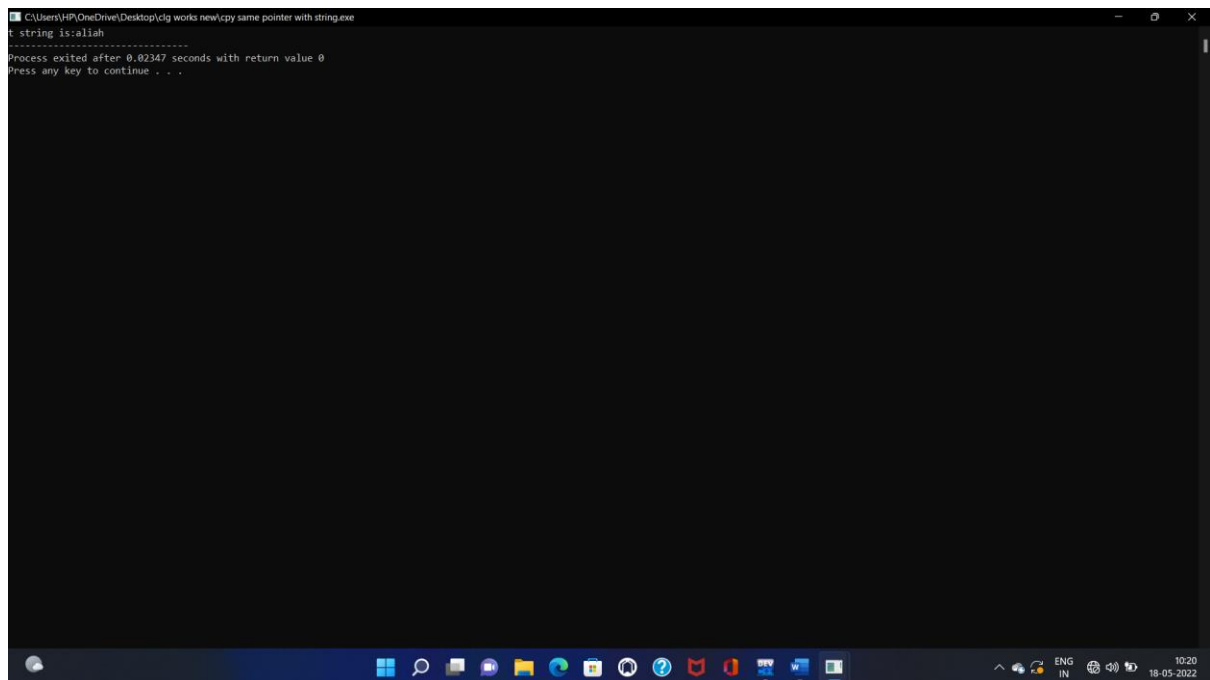

```
    }
```

```
    *q='\0';
```

```
    printf("t string is:%s",t);
```

```
    return 0;
```

```
}
```

```
C:\Users\HP\OneDrive\Desktop\c\lg works new\cpy same pointer with string.exe
t string is:aliah
