/*combining fork() & exec*/

```c
#include<stdio.h>

#include<unistd.h>

#include<sys/types.h>

#include<stdlib.h>

#include<sys/wait.h>

 int main(){

        char *argv[3]={"command-line",".",NULL};

        int f_val=fork();

        if(f_val==0){  //child process

                execvp("find",argv);

        }

        //put parent process in sleep for 2 sec,let the child finish its' execution

        wait((int *)2);

        printf("finished executing parent process,the child won't gey here-- you will only see this once\n");

        return 0;

 }
```

```c
/*combining fork() & exec*/
#include<stdio.h>
#include<unistd.h>
#include<sys/types.h>
#include<stdlib.h>
#include<sys/wait.h>

int main(){
    char *argv[3]={"command-line",".",NULL};

    int f_val=fork();

    if(f_val==0){  //child process
        execvp("find",argv);
    }

    //put parent process in sleep for 2 sec,let the child finish its' execution
    wait((int *)2);
    printf("finished executing parent process,the child won't gey here-- you
        will only see this once\n");
    return 0;
}
```

Terminal:

```
.
./main
./main.c
finished executing parent process,the child won't gey here-- you will only see this once
```
